Christopher James

IT Systems Engineer

Belfast, United Kingdom

Summary

Professional summary:

IT Systems engineer with 5+ years of experience in working with enterprise IT infrastructure and services. Specialises in IT systems administration, engineering, automation and deployment. Special interests include: unix, linux & macOS internals, network routing & switching and automation software.

Key skills & experience:

- System administration of Unix and Linux environments, supporting: *nix operating systems, Bash and Python.
- System administration and engineering of Apple desktop hardware and software applications for enterprise, including: macOS, Xcode, Instruments, Bash, Python, Swift and Jamf Pro.
- Network administration and network monitoring for enterprise, including: a strong working knowledge of common network infrastructure and network protocol (N+ and Splunk certified).
- Endpoint system security management, including: CVE review, vulnerability remediation, OS hardening, user access & application control.
- Co-leading management of a global staff device collection and co-ordinating global operating system deployment projects.
- Client application packaging and scripting for macOS and iOS. Client application code-signing and enterprise distribution for macOS and iOS.
- Web application support and development including: the customisation, configuration and deployment of a modern enterprise web service (VPC hosted with SSO and 2FA access) with supporting open source API connection components written in Python, deploying solution components to QA & Production enterprise environments.
- Version control using Git, GitHub and Bitbucket: <https://cjamesni.github.io> (My personal GitHub site)
- System engineering experience working with AWS hosted solutions, supporting: AWS CLI, NGINX+, EC2 and RDS.

Some favourite quotes:

"Ever tried. Ever failed. No matter. Try again. Fail again. Fail better."

Beckett

"Allons travailler!"(Get on with it!) Zola

Experience

CME Group

3 years 11 months

Desktop Engineer III, Global Desktop & IT Infrastructure Services

December 2017 - Present

Belfast, United Kingdom

- Primarily focused on delivering systems administration and systems engineering tasks for global desktop environments and IT infrastructure at CME Group.
- Specifically responsible for co-leading the management of a large staff device collection spanning the US, Europe and Asia, adopting a 'security first' approach.
- Standardising team processes and writing technical documentation.
- Research & development for individual and team projects.

Desktop Engineer II, Global Desktop & IT Infrastructure Services

March 2016 - December 2017 (1 year 10 months)

Belfast, United Kingdom

- Endpoint System Solutions Group member delivering systems support and systems engineering functions at CME Group.
- Escalation point for members of the internal customer support group locally and globally.
- Collaborating with teams from the Infrastructure & Operations department to remediate incidents of network, system or application(s) downtime.
- Managing endpoint system security, including: CVE review, vulnerability remediation, OS hardening, user access and application control.
- Co-ordinating global OS deployment projects, including: Jira based issue and task tracking, creation and maintenance of Epics, Stories, Dashboards and Sprints.
- Preparing macOS application packages, scripts, security and system updates for global distribution.
- Managing and assigning site assets.

Cobalt Technology

Infrastructure Support Engineer II, European Managed IT Services

January 2015 - March 2016 (1 year 3 months)

Citywest Business Campus, Dublin, Ireland

- Disaster recovery operations including monitoring the back-up and replication of virtual machines from customer-owned production environments to a managed secondary site (using VMware vSphere 5.5 and Veeam B&R 7). Managing snapshots and restarting failed replication jobs.
- Escalating significant back-up and replication issues to senior infrastructure engineers.
- Updating back-levelled firmware on IBM storage systems and collecting DSA system logs for diagnostics as required.
- Systems administration for hybrid Microsoft environments using PowerShell and Windows server administration tools.
- Managing client Active Directory forests including OU, security group, user and computer objects.
- Managing client GPOs via Group Policy Management Editor.
- Lync server administration of online and enterprise voice users. Assigning telephone DDIs.
- Implementing Lync server QoS to improve communication quality.
- Exchange server administration. Managing user mailbox assignment, distribution groups and global address lists. Setting up Unified Exchange Messaging services.
- Managing SharePoint site collections. Provisioning site storage and structuring SharePoint sites including subsites, libraries, lists and applications.
- Troubleshooting and reporting on services. Liaising with third parties to resolve problems.
- Supporting client's LAN networks.

Teleperformance

Technical Support Specialist, Samsung Electronics, UK Customer Services

September 2012 - December 2014 (2 years 4 months)

Quays Complex, Newry, United Kingdom

- Two years contact centre experience with the Teleperformance Group working as a technical support advisor for their client company, Samsung Electronics UK.
- Responsible for administering technical services and troubleshooting support for consumers of Samsung multimedia electronics products across the UK.

- Managing system configurations, hardware diagnostics, software updates and system recoveries.
- Explaining technical instructions to consumers via telephone, email and social media.

Norbrook Laboratories Ltd

Laboratory Technician, Norbrook Laboratories Ltd, UK

April 2009 - September 2009 (6 months)

Camlough Road, Newry, United Kingdom

- Six months work experience as a Lab Technician based within Norbrook Laboratories Microbiology Department. I was responsible for reading and recording test data onto company paperwork, creating batch reports and updating company databases.
